

Improve School Safety with an Integrated Security Solution

With Verkada, hardware and software are fully integrated in an intuitive, cloud-based platform to enable secure remote monitoring and faster emergency response. Learn how school districts are using Verkada to strengthen school safety and simplify security management, all while safeguarding student privacy.

Products

Video Security

- Centralize video monitoring across your entire school district.
- Secure school grounds with proactive alerts for unusual motion and people of interest.
- Tested and rated for durability and use in high-traffic environments.

Access Control

- Verify door-based activity with video evidence of who came and went.
- Provision staff with tiered access levels across various points of entry.
- Schedule doors to lock or unlock based on school hours and bell schedules.

Sensors

- Detect for vaping, smoking or bullying in bathrooms and locker rooms.
- Be alerted of any sudden changes in temperature, noise levels or air quality.
- Monitor environmental conditions to protect students, staff, and IT equipment.

Key Benefits

Protect Student Privacy

Control access with role-based permissions and blur faces with one-click.

Real-Time SMS Alerts

Set proactive alerts to be notified of suspicious activity occurring in critical areas or after hours.

Search Filters for Quick Investigations

Use powerful video forensics to filter people, vehicles, motion and other attributes.

Share Video for Incident Response

Share live video, footage or entire floor plans to first responders from any browser or mobile device in minutes.

Lockdown Doors in Seconds

Create custom Lockdown events to secure doors in the event of an emergency.

Monitor From Anywhere

Remotely manage doors, cameras, and sensors from any browser or mobile device – no VPNs or configurations.
