

Improve Safety and Security with a Fully Integrated Solution

With Verkada, hardware and software are fully integrated in an intuitive, cloud-based platform to enable secure remote monitoring and faster incident response. Learn how nonprofits use Verkada to strengthen safety while simplifying security management.

Products

Video Security

- Centralize video monitoring across your entire organization.
- Secure sites with proactive alerts for unusual motion or repeat offenders.
- Tested and rated for durability and use in high-traffic environments.

Access Control

- Verify door-based activity with video evidence of who came and went.
- Provision staff with tiered access levels across various points of entry.
- Schedule doors to lock or unlock based on hours of operation.

Sensors

- Detect for costly and prohibited events such as smoking or vaping.
- Be alerted of any sudden changes in temperature, noise levels or air quality.
- Monitor environmental conditions to protect people and critical infrastructure.

Key Benefits

24/7 Proactive Security

Know instantly when repeat offenders are on site or suspicious activity occurs after-hours.

Real-Time SMS Alerts

Set proactive alerts to be notified of suspicious activity occurring in critical areas or after hours.

Search Filters for Quick Investigations

Use powerful video forensics to filter people, vehicles, motion, and other attributes.

Share Video for Incident Response

Share live video, footage or entire floor plans to first responders from any browser or mobile device in minutes.

Lockdown Doors in Seconds

Create custom Lockdown events to secure doors in the event of an emergency.

Monitor From Anywhere

Remotely manage doors, cameras, and sensors from any browser or mobile device – no VPNs or configurations.
